Welcome to the Maplewood Dental family! We are delighted that you have chosen our office to care for your dental needs. Our office hours at Maplewood Dental are Monday through Thursday from 9:00 am to 5:00pm. We are occasionally open on Fridays by appointment only.

Our goal is to establish a long term, professional dental relationship in a calm, stress-free environment. We are proud to provide gentle restorative and cosmetic dental care for the whole family. Our office provides the latest in dental technology including digital x-rays, intraoral camera with a cavity detector and comfortable wand anesthesia.

As a new patient you can expect your first visit to include a comprehensive exam with a full mouth series of digital x-rays. The x-rays aid the doctor in locating any problems areas that may not be seen from during the dental exam. This process allows us to develop a treatment plan unique to your dental needs.

We offer cosmetic restorations, treatment of periodontal disease, routine cleanings, cosmetic procedures, teeth whitening, and all areas of restorative dentistry such as crowns, bridges, dentures, and partials. We will help you discover the best options for you and your smile.

We appreciate your confidence and trust in our dental team.

Sincerely,

Dr. Pamela Bell
